

FortiAP™ Cloud

Manage your standalone FortiAP deployment

FortiAP Cloud is a cloud-based SaaS, offering zero touch deployment, configuration management, reporting and analytics for standalone FortiAP deployments. FortiAP Cloud offers a simple, intuitive, easy-to-use interface for managing your wireless that is available from anywhere at any time. FortiAP Cloud can scale from a small handful of APs all the way up to thousands of devices across multiple sites.

Zero Touch Deployment

Initial configuration of access points can be a difficult proposition, often requiring expert staff on site to configure each device individually. FortiAP Cloud with FortiDeploy greatly simplifies initial configuration and onboarding by providing one-touch provisioning when devices are deployed.

Highly Scalable

Cloud-based model can manage deployments from single digits up to multiple thousands of FortiAPs, and can easily grow with your deployment along the way.

Multi-Tenancy

Maintain multi-tenancy for many customers within a single license. Simple Central visibility and access across all tenants. Enable Read-Only customer accounts with unique customer logos on reports.

Highlights

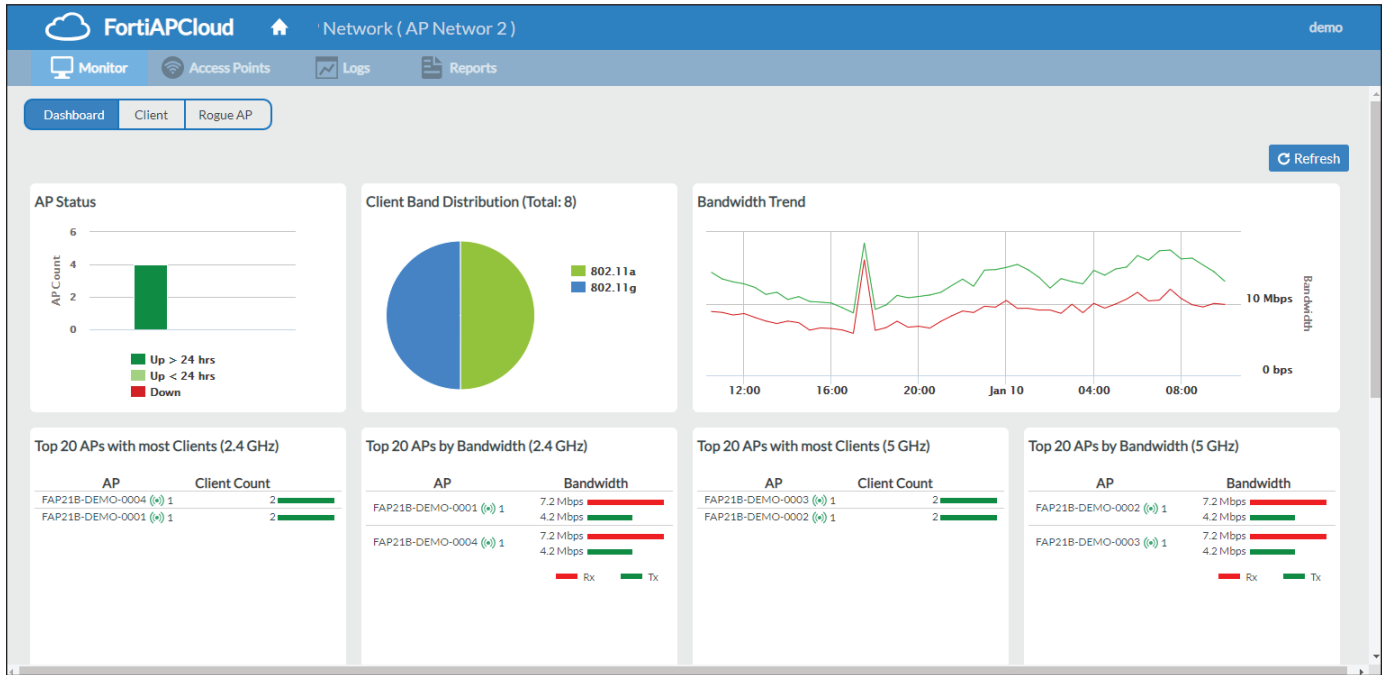

- Easy Provisioning — FortiAP network settings are configured through an easy-to-understand UI
- Robust Monitoring — Topology views, Port level view, Status monitoring
- Troubleshoot — Event Logs, Alarms, and Alerts
- Free Service Option — Basic configuration and 7-days of logs at no charge
- Two-factor Authentication — Supports FortiToken for two-factor authentication of user login
- Smart APs — FortiGuard-backed UTM services when using the FortiAP-S Smart line of Access Points
- Privacy Compliance — Isolated instances for Europe, Americas, and Asia to meet local privacy laws.

Highlights

Dashboard for Ease of Management

The home dashboard provides a view of all managed APs, including up time, clients, and usage statistics in your environment.

Click through to get additional client details and or detail about Rogue APs that may be in your environment.

The interface allows for detailed management of APs. The table below shows the details for four APs:

Name	Status	Join Time	Clients	RX Bandwidth	TX Bandwidth	Interfering APs	Operating Channel	Subscription
FAP21B-DEMO-0001	+	2019-01-10 10:00	2	7.42 Mbps	4.13 Mbps	0	(w) 1 0	
FAP21B-DEMO-0002	+	2019-01-10 10:00	2	7.42 Mbps	4.13 Mbps	0	(w) 1 0	
FAP21B-DEMO-0003	+	2019-01-10 10:00	2	7.42 Mbps	4.13 Mbps	0	(w) 1 0	
FAP21B-DEMO-0004	+	2019-01-10 10:00	2	7.42 Mbps	4.13 Mbps	0	(w) 1 0	

The client list provides detailed information for each connected device. The table below shows the details for five clients:

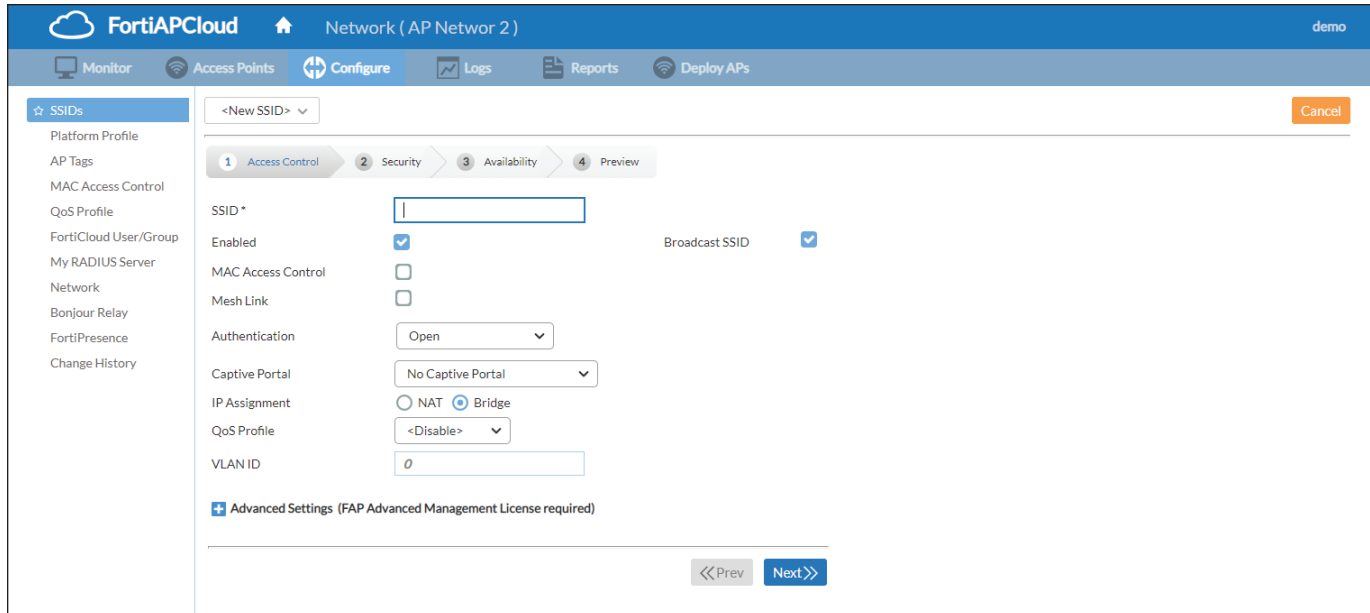

MAC	User	Host	Client IP	Download (MB)	Upload (MB)	Up Time	Signal Strength	Band	Security	VLAN ID	Group	Manufacturer

Highlights

Simple Configuration

Configure your network with ease with the simple UI workflow. Set your SSID, security settings, etc and let FortiAP Cloud take care of

the rest. Need a Captive Portal for your guests? It can be set up in a few clicks of the mouse.

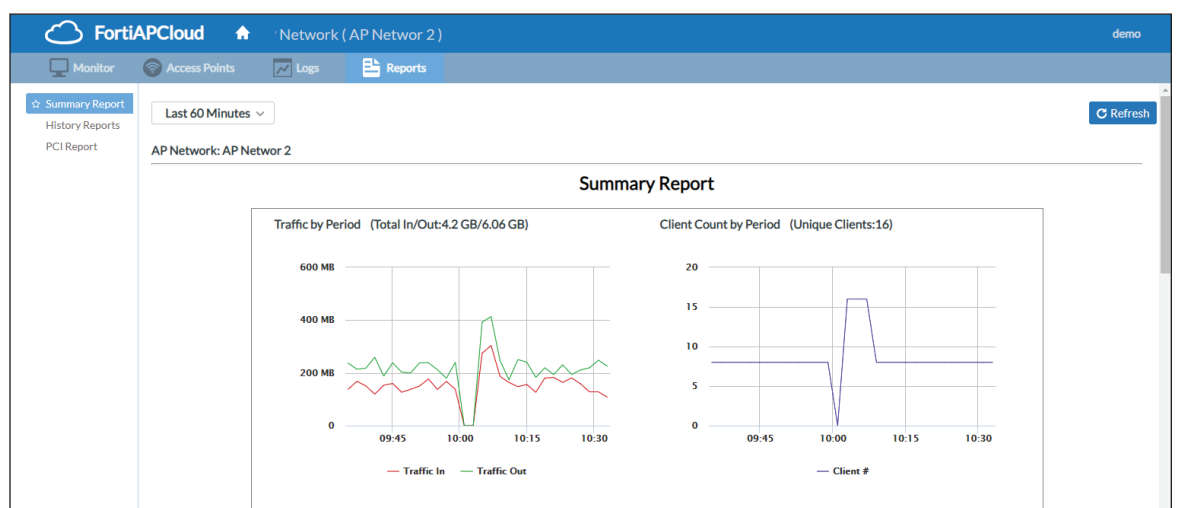

Zero Touch Deployment

Large Network deployments, especially those involving distributed locations, can create challenges including the potential need for skilled workers to stage and set up complex designs. FortiAP Cloud leverages Fortinet's FortiDeploy logic to simplify the deployment aspect. All that is required onsite is a person to physically connect the AP to its power source and ensure internet access is available. Each FortiAP ships with an individualized key

allowing it to be managed by FortiAP Cloud. The administrator need only add that key to their dashboard and the FortiAP can pick up its configuration from FortiAP Cloud directly. With the FortiDeploy service, multiple FortiAPs can be combined into a single key for rapid enablement of large numbers of devices. For more information on FortiDeploy, please see our website at www.fortinet.com.

Reporting

Report on current and past information with ease, store past reports, or run a PCI Compliance report.

Order Information

Existing FortiGate customers that are interested in cloud management of FortiAPs that are connected to their FortiGates should leverage FortiGate Cloud, not FortiAP Cloud.

FortiAP Cloud offers a tiered pricing model, with basic configuration and control of your Access Points and 7 days' worth of logging at no charge. To enable advanced wireless configuration options, 1 year of logging, FortiPresence with 1 year of data retention, and 8x5 FortiCare customer service, a per AP license is necessary.

Note that for FortiAP-S, a different license is required which also enables FortiGuard services on the AP.

Product	SKU	Description
FortiAP Advanced Management License for FAP-S Series	FC-10-90APS-173-02-DD	1 Year FortiAP Cloud FAP-S Advanced Management License includes: FortiGuard Subscription Services, Premium AP Management Features, 1 year Log Retention, FortiPresence Cloud Service, 8x5 FortiCare.
FortiAP Advanced Management License for FortiAP Series	FC-10-90AP1-173-02-DD	1 Year FortiAP Cloud FAP (FAP/FAP-U/FAP-C) Advanced Management License includes: Premium FAP Management Features (where applicable for model), 1 year Log Retention, FortiPresence Cloud Service, 8x5 FortiCare.
FortiAP Advanced Management License for FAP-S Series	FC-10-90APS-639-02-DD	1 Year FortiAP Cloud FAP-S Advanced Management License includes: FortiGuard Subscription Services, Premium AP Management Features, 1 year Log Retention, FortiPresence Cloud Service, 24x7 FortiCare.
FortiAP Advanced Management License for FortiAP Series	FC-10-90AP1-639-02-DD	1 Year FortiAP Cloud FAP (FAP/FAP-U/FAP-C) Advanced Management License includes: Premium FAP Management Features (where applicable for model), 1 year Log Retention, FortiPresence Cloud Service, 24x7 FortiCare.

¹ Advanced configuration features include the ability to customize basic rates, the ability to disable data rates, the ability to block intra-SSID traffic, and the ability to configure a Bonjour relay.
