

# FortiGuard<sup>®</sup> Analysis & Management Services

Datasheet

## Hosted Central Management Solutions for FortiGate Systems

Centralized security reporting, logging, and configuration management are critical components of a large enterprise's security best practices. To enable smaller organizations to benefit from these capabilities, which are typically priced out of reach of smaller organizations, Fortinet offers the FortiGuard Analysis and Management Service. By delivering the solutions via a hosted service model, businesses of all sizes using FortiGate<sup>®</sup> platforms can have a robust, fault tolerant security reporting, log management, and centralized management solution. There are no additional requirements for hardware, software or facilities—providing a low cost of entry for smaller organizations.

### Analysis Features

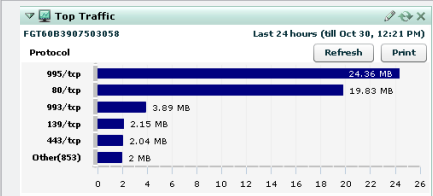

- Security and device event logging
- Real-time event monitoring
- Pre-configured graphical reports
- Flexible report delivery options

- **On-Demand Service** Securely access the service from any Internet connected web browser.
- **Reporting** Ability to instantly view your risk posture, network performance and availability of applications with an easy to use interface. Reports can be generated and selected with an online calendar picker widget.
- **Log Management** Review logs real time or historically to assist with detailed understanding of FortiGate System Event, Traffic, Attack, Antivirus, Web Filter, Email Filter, IM, Content and VoIP logs as well as site-to-site and remote access VPN usage.
- **E-Mail Content Archival** Store email content and track activity using advanced content analysis for complete understanding of internal and external compliance.
- **User Roles and Privileges** Easily control who has access to the service, what their privileges are and what alerting and reporting capabilities they are assigned.
- **E-Discovery** E-Mail data collection tool for forensic analysis allows you obtain e-mail data using multiple criteria.

### Management Features

- **Configuration Template Repository** Store configuration data for multiple FortiGate devices centrally for rapid deployment of new devices using similar policies.
- **Firmware Management** Maintain a central repository of FortiGate firmware images and update devices in real-time or on a scheduled basis.
- **Script Tool** Allows the deployment of identical configuration items to many devices.
- **Multiple Roles for Administration** Easily control who has access to the service, what their privileges are, to which devices they have access.
- **Simplified Disaster Recovery** Configuration and log data is stored off-site and available 24x7x365 for business resumption.
- **Remote Viewing** Overcomes challenges related to site visibility and management of remote locations.

#### Ten Customizable Dashboard Widgets

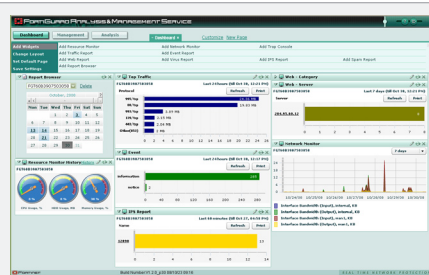

- Resource Monitor [real time, historical] CPU, HDD, Memory with alert profiles
- Network Monitor: interface bandwidth, SSL & IPSec Bandwidth, # of sessions
- Event Monitor
- Traffic Report [drill down]
- Web Filtering Report [drill down]
- Virus Report [drill down]
- IPS Report [drill down]
- Anti Spam Report [drill down]

- Secure data transmission and access

### COST-EFFECTIVE

#### FortiGuard Analysis and Management Service

- Hosted within the FortiGuard Network
- Reliable service with expert support
- Consistent backups and upgrades
- Integrated FortiGuard Security Subscription Services

## FortiGuard Analysis and Management Service Ordering Guide

Fortinet offers simple and compelling pricing for FAMS. Pricing is based on an annual contract. Through your authorized FortiPartner, Fortinet sells blocks of 10 gigabytes of storage for a one-year period. You can add blocks together to increase the amount of storage or increase the number of years of service. You provide these details of the purchase when you enter the contract information into the FAMS portal. A FAMS contract supports up to 10 devices.
